Forecast for Saturday 14 Nov 2020

Weather: Cloudy throughout with some rain at times across the south of the area and Skye. Rather more persistent and heavier rain will develop from late afternoon onwards here. Drier conditions expected across the north until dusk when some rain will spread from the south.

Chance of cloud free mountain/hill tops above 800m: A lot of low cloud between 400 and 600 metres, however some of this lifting from western coastal ranges in the afternoon as southeasterly winds afford some shelter. Some clearer breaks developing across Sutherland in the afternoon too.

Visibility: Good out of rain and in shelter, otherwise rather hazy in rain, locally poor in the coastal southwest.

Met Office Aberdeen Meteorologist's View
Risk of higher summit gales along the west coast, especially from late afternoon onwards.

Forecast for Sunday 15 Nov 2020
Weather: Low confidence for detail. Overnight rain in the far north clearing then the morning should be dry. Cloud and patchy rain will spread northwestwards in the afternoon, dying out towards dusk. Further rain developing from mid-evening. Chance of some higher summit snow from mid-afternoon but patchy in nature.

Maximum wind: Southerly 25 mph

Chance of cloud free mountain/hill tops above 800m: Patchy cloud around 700 metres in the morning, with patchy cloud down to 500 metres in any afternoon rain.

Visibility: Occasionally poor in rain.

Temperature: **Glens:** Plus 4 rising to 10 Celsius
At 800m: Plus 3 Celsius
Freezing level: Above summits falling to 1200 to 1400 metres by afternoon
